DETAILED ACTION

1. Claims 37 and 39-41 are presented for examination.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 37 and 39-41 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claimed subject matter in question is the step of "programming the memory cell until the charge of the memory cell is above the programmed-cell reference level". It is noted that applicant has referred to step 905 of Fig. 9 and page 25, lines 19-22 of the specification as providing support for that step. The examiner, however, after carefully reviewing the disclosure of the application, finds no support for the above claimed subject matter.
